

microBIOMETER® Project Management

Enhanced user interface ~ Project creation ~ Team member collaboration

We are excited to release a new feature to the microBIOMETER® app. **Project Management (PM)** allows users to create custom projects utilizing unique fields and enables team members to contribute their microBIOMETER® soil test results to the project.

How does Project Management work?

- Update your microBIOMETER® app to [Version 3.5](#).
- Create a project on the microBIOMETER® [cloud portal](#) with fields for any sample data you would like such as amendments used, growing practices, etc.
- Invite team members to add their test results to the project.
- Access ALL project sample data from the cloud.
- Download the data with custom fields, dates, and GPS locations.
- Please visit our [YouTube](#) channel for PM tutorials
- Email support@microbiometer.com with any questions or feedback.

The screenshot shows the 'Edit, Create, Join or Clone a Project' screen in the microBIOMETER app. At the top, there's a green header with a back arrow, the title 'Edit, Create, Join or Clone a Project', and a save icon. Below the header, a dropdown menu shows 'Choose a project: AMF Trials' with icons for adding, deleting, and cloning. The main area contains several settings and field configurations:

- Members can**: A toggle for 'fields' is turned off. Below it are 'Create' and 'Delete' buttons.
- Add new data field**: A plus sign icon.
- Co-owner Code**: aa75e9e354
- Member Join Code**: 1363530176
- Class**: Loamy
- Crop Type**: A choice field with options: Trees, Turf, Pasture, Meadow, Crops, Forest.
- Crop Quality**: A choice field with options: Excellent, Good, Fair, Poor.
- Mgmt**: A choice field with options: None, Synthetic, Organic, Bridge Program.
- Irrig**: A text field with a 'group' dropdown.
- Stre**: A text field with a 'group' dropdown.
- Notes**: A multi-line text field with a dropdown set to 'Notes : There are no options to set.'
- Member Editable**: A toggle switch is turned on.
- Not Named**: A checkbox is checked, with a dropdown set to 'There are no options to set.'

A modal menu is open over the 'Irrig' field, listing field types: group, number, text, multiLine, choice, phone, datetime, and email.
